

The world's brightest binoculars.

Anatomy of the world leader in light transmission.

XTR® Technology. The ultimate optical performance enhancer, this Bushnell-exclusive technology employs multiple layers of anti-reflective coatings to transmit an amazing 99.73% of available light per lens. That would be more than anyone else. On any continent.

PC-3 Phase Coating. Elite binoculars are built with the finest barium crown BaK-4 glass roof prisms, which are then phase corrected with our proprietary PC-3 phase coating. This compensates for phase shifts of light rays to deliver the pinnacle of razor-sharp clarity and resolution.

Magnesium Strength. Magnesium alloys are among the lightest available in modern engineering. They're also super-tough, and used to form the skeletal structure of Elite binoculars.

>> MAGNIFY TECHNOLOGY

BINOCULARS

The elements of superiority. The world over, you won't find a brighter pair of binoculars – independent testing proves it. Let dawn and dusk be your proving grounds. One look and you know Elite® binoculars transcend comparison in every category. Not only in light transmission, but clarity, color fidelity, resolution and edge-to-edge sharpness as well. You'll also notice all new 2009 models have been updated with textured soft-touch grip panels for the utmost in handling comfort.

To build the very best – optics entirely original and superior in every way – we started with a blank sheet of paper. From there, we added the finest components available and a host of industry-leading proprietary technologies. Our 60+ years of excellence in the field brought it all together, and the result is a masterpiece of optical engineering so radically ahead of its time, there was only one name fitting. Elite.

Rainguard® HD water-repellent coating. For 2009, all Bushnell Rainguard-equipped optics will feature new hyper-efficient Rainguard HD. The next generation of the world's most effective anti-fog technology, it breaks up moisture even faster and more effectively than our original formula, plus a more slick surface to help clear the elements on the lens easier and faster.

The tests are bulletproof. The results are the same. The world’s brightest binoculars.

There’s nothing brighter or sharper on the planet. Except maybe the instant of enlightenment that comes when you put them to your eyes. With a combined 90% light transmission, our award-winning Elite binoculars are the reigning world leaders in the category. That’s right, optical perfection is officially yours for the taking – thank our exclusive XTR Technology and the finest components available today. BaK-4 roof prisms with PC-3 phase coating boost image clarity and contrast to never-before-seen levels. And the outlook is bright and clear in any weather with our new Rainguard HD coating and fully waterproof, fogproof construction. The streamlined, ultra-light magnesium chassis adds impeccable balance, feel and good looks to their long list of attributes. For comfort, we’ve updated the design with textured, soft-touch rubber grip pads.

FEATURES: Rainguard HD water-repellent lens coating | XTR technology | PC-3 phase coating | Fully multi-coated optics | BaK-4 roof prisms | 4-position twist-up eyecups | O-ring sealed 100% waterproof/fogproof/dustproof construction | Long eye relief | Rugged, yet light rubber-armored magnesium chassis with scratch-resistant powder coat | Center focus | Locking center diopter adjustment dial | Quick-connect secure strap and custom-molded case included

NEW
8x 43mm
630843

Our top-of-the-line, precision light-gathering binocular.

Inspired by a combined commitment to heritage and innovation to create the sharpest, clearest and brightest optics available today.

NEW
10x 43mm
631043

Premium long-range binocular – excellent for long-distance birding, hunting or wildlife observation.

Doubler 2.5x 620001

Transforms your Elite binoculars into a spotting scope. Multiplies magnification by 2.5x. Features fully multi-coated optics, BaK-4 prisms and rugged rubber armor. Friction fit – easy on/off. Fits most other full size roof prism binoculars as well.

Rainguard® HD. Without it, you’re not ready. A wet lens or a misguided breath that would fog conventional glass will never cost you a view. This patented, permanent, water-repellent coating causes moisture from rain, snow, sleet or condensation to bead up and scatter less light, so you get a clear, bright view when other optics would be rendered useless.

XTR® Technology. Using 60 layers of coatings on each prism, this revolutionary system harnesses and optimizes available light, boosting Elite binoculars to their world-leading 99.73% light transmission per lens. It’s exclusive to Bushnell, and hands-down the most efficient means for transporting light through an optical system.

PC-3® Phase Coating. A chemical coating applied to the prisms to enhance resolution and contrast for the brightest and clearest images possible.

Lens Coating. An uncoated lens will reflect about 10% of the light that attempts to pass through it. Magnify that by as many as ten internal lenses and uncoated optics will produce a very dim image in even the brightest situation. A lens coating can reduce reflection to as little as 4%, and sophisticated multi-layered coatings applied to more exposed lens surfaces the better and brighter the final image will be. All Elite binoculars are fully multi-coated with XTR, which means every lens surface is treated with multiple layers of special anti-reflection coating for the brightest image possible, allowing 99.73% of the light to pass through.

10x 50mm 621050
12.5x 50mm 625012

Optical perfection featuring a larger objective for enhanced brightness and extended field of view.

Compare them to the finest at the optics counter for an enlightening experience.

Ultra-high performance, now within reach. Elite e²™ binoculars possess the super-premium clarity, brightness and durability once only attributed to European craftsmanship and components. Fully multi-coated and featuring XTR technology, our Advanced Fusion Hybrid Lens system delivers 99.7% light transmission per lens, plus a level of edge-to-edge clarity and contrast that makes for the utmost in viewing precision. Our new Rainguard HD coating eliminates lens fogging, boosts brightness and scatters moisture even faster than original Rainguard. Elite e2 binoculars are also 100% waterproof,* fogproof and built around a tough, lightweight magnesium chassis.

FEATURES: Advanced Fusion Hybrid Lens System* | Rainguard HD water-repellent lens coating | XTR technology* | PC-3® phase coating* | Twist-up eyecups | Fully multi-coated including Ultra Wide Band coating | BaK-4 roof or porro prisms | O-ring sealed 100% waterproof/fogproof/dustproof construction* | Long eye relief | Rugged, yet light rubber-armored magnesium chassis with scratch-resistant powder coat* | Locking center diopter adjustment dial* | Quick-connect secure strap and custom-molded case included

Rainguard® HD.

Without it, you're not ready. A wet lens or a misguided breath that would fog conventional glass will never cost you a view. This patented, permanent, water-repellent coating causes moisture from rain, snow, sleet or condensation to bead up and scatter less light, so you get a clear, bright view when other optics would be rendered useless.

A streamlined new shape with a massive field of view.

See what the new Legends are made of.

Totally redesigned with a high-performance optics upgrade and a slimmer, lighter, tougher body design, and it's easy to see where we got the "Ultra•HD." For the ultimate in color fidelity, brightness and light transmission, they're equipped with super-premium ED Prime Glass. The razor-sharp optics are fully multi-coated and feature our new Ultra Wide Band Coating that optimizes brightness and contrast. New Rainguard® HD also boosts light transmission while ensuring foul weather or your own breath will never cost you a view. We cut the weight by adding a magnesium chassis, and enhanced comfort with soft-touch grip accents on the rubber-armored housing. A locking diopter maintains your settings. With class-leading field of view and extra-long eye relief, the latest chapter of the Legend covers more country with less effort than ever before.

FEATURES: ED Prime Glass | Ultra Wide Band Coating | Rainguard HD water-repellent lens coating | Ultra wide field-of-view | Long eye-relief | Lightweight, magnesium chassis | Waterproof/fogproof | Soft touch grips | Locking diopter | Includes premium carry case, neckstrap, microfiber lens cloth and deluxe binocular harness

Light, bright wide view and tough.

Why Extra-Low Dispersion? Unlike ordinary lens surfaces, the ED Prime Extra-Low Dispersion flouirite glass used in our new Legend Ultra-HD binoculars allows the visible colors of the spectrum to focus at virtually the same point. This helps provide improved color resolution and contrast, practically eliminates chromatic aberration and color-fringing, and brings out detail even under low-light conditions.

Red, Green and Blue color spectrums meet at the same focal plane, to eliminate color aberration and provide the ultimate in crisp, clear images.

ED Prime Glass. ED Prime Extra-Low Dispersion fluorite glass delivers amazing color resolution and contrast, and virtually eliminates chromatic aberration and color-fringing to bring out the most distinct details possible in low-light conditions.

Ultra Wide Band Coating. An anti-reflection coating process that is customized for every lens element in the optical path, in order to allow the best possible light from the front glass all the way back to the eyepiece. The result? Optimum brightness and true color across the light spectrum.

Rainguard® HD. This patented, permanent, water-repellent coating causes moisture from rain, snow, sleet or condensation to bead up and scatter less light, so you get a clear, bright view when other optics would be rendered useless.

High-powered viewing and concealment.

Tougher than a rutting bull. Even if it's a gray squirrel you're after.

Optical precision built for a lifetime and more. A Legend endures and, in this case, gets better with age. Still the rugged standard for brightness and clarity, Legend roof-prism binoculars are rugged, yet lightweight lighter thanks to a magnesium chassis. With their Rainguard HD lens coating, waterproof, shockproof, virtually bombproof design, plus a stout layer of rubber armor, they're ready for anything. Fully multi-coated optics and premium BaK-4 prisms produce an outstanding level of light transmission, sharpness and color fidelity. As always, we offer both roof-prism and more economical porro-prism models. Whichever you choose, Legends deliver the optical performance you demand and the durability you need.

ROOF-PRISM MODEL FEATURES: PC-3® phase-coated BaK-4 roof prisms | Fully multi-coated optics for maximum light transmission and optimum brightness | Heavy-duty, 100% waterproof/fogproof construction | Rainguard® HD water-repellent lens coating | Long eye relief | Twist-up eyecups allow quick adjustment for optimum eye relief | Large center-focus knob for precise focusing – even when wearing gloves | Trim, ergonomic shape for easy, all-day use | Textured, non-glare, non-slip rubber armor absorbs shock | Knurled diopter adjustment for precise and reliable adjustments | Lightweight magnesium chassis makes these binoculars slimmer and 15% lighter

7x 36mm 243607

Their wide field of view
covers more country in
your quest for a P&Y trophy.

Because in the wild, first and last light are as precious as gold.

That being said, Excursion binoculars just might belong in Fort Knox. Their fully multi-coated optics and premium BaK-4 prisms with our exclusive PC-3® phase coating transmit ultra-bright, sharp images from edge to edge, dawn to dusk. A lightweight composite chassis and streamlined, roof-prism design make them comfortable to carry.

FEATURES: Wide Field of View | PC-3 phase coating for color fidelity and clarity of image | Twist-up eyecups | BaK-4 roof prisms | Fully multi-coated optics | 100% waterproof/fogproof construction | Large, center-focus knob for precise focusing – even when wearing gloves | Long eye relief

8x 42mm 120842
An exceptionally versatile, easy-handling configuration.

Go without food and sleep, but not without great binoculars.

The only thing more essential is passion.

You'll answer the alarm and miss a meal or two for your love of the outdoors. But, do you have the right equipment? Our Trophy series is the ideal lineup to cover all your pursuits, whether hunting, hiking, fishing or adding species to your life list. These binoculars are built tough, with a rubber-armor housing that's O-ring sealed and nitrogen purged for 100% waterproof/fogproof dependability. Fully multi-coated optics and premium BaK-4 roof prisms deliver sharp, bright images.

FEATURES: BaK-4 roof prisms for bright, clear, crisp viewing | Fully multi-coated optics | Waterproof: O-ring sealed and nitrogen purged for 100% reliable, fog-free performance | Twist-up eyecups on standard-size models allow quick and easy adjustment for optimum eye relief | Large, center-focus knob for easy, precise adjustments | Ribbed, non-slip rubber armor absorbs shock while providing a firm grip

8x 42mm 238042
10x 42mm 230142

Rugged, long-range roof-prism design is excellent for outdoor travel.

10x 50mm 231050
12x 50mm 231250

Outstanding long-range binoculars with large objective lens for superior light gathering.

8x 27mm 230827
10x 27mm 231027

Powerful, rubber-armored compacts produce bright, clear images.

10x 27mm 231028

Great pocket-sized hunting binoculars featuring Realtree® Hardwoods® HD™ Grey.

8x 42mm 238044
10x 42mm 230144

Rubber-armored in Realtree® AP, these powerful roof-prism binos are perfect for avid sportsmen.

Built for the rigors of field use.

Every Trophy roof-prism binocular is built with the finest barium crown BaK-4 glass roof prisms and fully multi-coated optics – which means every lens surface is treated with a special anti-reflection multi-coating for optimum light transmission and a brighter, sharper, higher-contrast image.

Evolve with optics of a higher order.

A natural selection for any species on your life list. The most remarkable species are those most specially adapted to their environment. Conversely, to see them all, you and your optics have to be remarkably versatile. Our new Birding Series® binoculars thrive in virtually any setting – offering bright, crisp views of your quarry near and far. Fully multi-coated optics and excellent close-focus capabilities – as close as 6 ft. – for short-range viewing help you catalog every detail. Extended eye relief makes long viewing sessions comfortable.

ROOF-PRISM MODEL FEATURES: BaK-4 roof prisms for bright, clear, crisp viewing | Fully multi-coated optics for superior light transmission and brightness | Textured center-focus knob for easy, precise adjustments | Rugged, non-slip rubber armor absorbs shock | Waterproof/fogproof construction

PORRO-PRISM MODEL FEATURES: BaK-4 porro prisms (on select models) for bright, clear, crisp viewing | Fully multi-coated optics (on select models) for superior light transmission and brightness | Textured center-focus knob for easy, precise adjustments | Rugged, non-slip rubber armor absorbs shock

**NEW 7x 36mm
Excursion® EX Birding Series**
243606

Bright and clear with a class-leading field of view and an awesome close-focus range of 6 ft. Streamlined design easily goes anywhere you can. Includes binocular harness.

8x 42mm 220842
Outstanding optical performance in a trim, well-balanced roof-prism design.

10x 42mm 221042
Outstanding long-range binocular. Ideal for long-distance birding or wildlife observation.

8x 40mm 118401

The classic birding binocular. Ideal for beginners.

8x 42mm 132000

Premium performance for all-day viewing comfort.

Thirst for life’s finest views and you’re bound to get shaken and stirred.

Our Stableview binoculars keep you on solid ground with two modes of onboard image stabilization technology. They instantly cancel hand movement for extended viewing comfort. Normal mode compensates for three degrees of motion – ideal for what carries you, whether boat, car, plane or horse. Fine mode nullifies subtle movements of your hand for extended viewing time. So get after it. We’ll keep you steady.

10x 35mm 181035

Revolutionary image-stabilizing binocular for a steady view.

FEATURES: 10x magnification | 35mm objective lens | Stabilizes up to three degrees of movement | Superior quality | Neutralizes effects of hand tremors, vibrations and other movements | Fully multi-coated optics | PC-3® phase-coated BaK-4 prisms | Waterproof and fogproof | Neck strap and carrying case

Built to withstand extreme nautical environments.

And float in them. The U.S. Coast Guard suggests you keep them on board, but we made our Marine series binoculars buoyant, waterproof and corrosion resistant, so a little dunking won’t deep-six your day.

You’ll appreciate the ultra-bright, crisp views granted by their multi-coated optics and premium BaK-4 prism glass. Rugged rubber armoring provides a sure grip, absorbs shock and keeps them from sliding in rough conditions. They’re essential equipment if you spend much time on deck, and aren’t fazed by a little time off it.

FEATURES: BaK-4 porro prisms for bright, clear, crisp viewing | Fully multi-coated optics | 100% waterproof/fogproof | O-ring sealed and nitrogen-purged to keep out moisture | Highly resistant to saltwater corrosion | Non-slip, non-skid rubber armor cushions bumps and shock, prevents sliding and provides a firm grip when wet | Hermetically sealed | Fold-down eyecups | 100% UV protection

NEW 7x 50mm DIGITAL 137507

Features a built-in 3-axis digital compass for true heading.

7x 50mm w/Reticle 137500

A classic marine bino with internal rangefinder and illuminated compass.

7x 50mm 137501

Well-balanced, bright and steady for long hours on the water.

Water, water everywhere but never again in your optics.

We build optics with foresight.

Thoughts such as, spend enough time on the water, and your equipment will spend some time in it. The H2O series binoculars are O-ring sealed and nitrogen purged to completely lock out moisture should you spill, take one overboard, or simply run into foul weather along the way. Rubber armoring with textured pads gives you a grip in slippery situations. Multi-coated optics and premium-quality BaK-4 prism glass maximize light transmission and image clarity. You'll quickly see how a little planning on our part goes a long way to magnify your adventures on and around the water.

FEATURES: BaK-4 prisms for bright, clear, crisp viewing | Multi-coated optics for superior light transmission | 100% waterproof: O-ring sealed and nitrogen purged for reliable, fog-free performance | Non-slip rubber armor absorbs shock while providing a firm grip | Twist-up eyecups | Large center-focus knob for easy adjustments | Longer eye relief

If you like spending time around water, but fishing your bins out of a pond or snowbank isn't what you had in mind, never fear. Waterproof construction and textured, non-slip rubber pads give you a grip on the situation, even where it is slippery, wet and wild.

7x 50mm
150750

Grace your boat deck with a huge field of view and ideal magnification for long-range viewing.

8x 42mm 132408
10x 42mm 132410
12x 42mm 132412

Our all-purpose, full-size BaK-4 porro-prism for high magnification at a distance.

8x 42mm 150842
10x 42mm 151042

Choose 8x or 10x – both pack powerful, bright optics into a 100% waterproof package.

Worth their weight in cash you'd spend on front-row seats.

Put yourself in the middle of the action from anywhere in the stands with our new Spectator Series® binoculars. With an extra-wide field of view and a PermaFocus® design that never needs adjustment to be razor-sharp, you'll never miss a second, inch or yard of the action. See it all through bright, clear multi-coated optics and pass 'em around – their rugged, lightweight housings are built for the long haul. Choose from our pocket-sized compact or two full-size models for even greater coverage area and brightness.

FEATURES: Wide field-of-view | Premium glass | PermaFocus® | Multi-coated optics for brightness | Streamlined, yet rugged strong design | Lightweight | Upgraded case and neckstrap

NEW
8x 40mm
170840C

Outstanding all-around choice for field of view and brightness.

The safest and quickest way to upgrade your seats come game day.

With a field of view twice as wide as standard binoculars, our Xtra-Wide binoculars dish up double the action. Two cars at opposite ends of the track, the pass being completed as the QB gets crunched, a friend in the front row and the entire cast on stage – feast your eyes on every ounce of the show. Whether you choose the standard or compact size, you'll have twice the viewing area and see more of what you came to see.

4x 30mm
130521

Ideal fast-paced sports binocular featuring lower power for widest possible view.

FEATURES: Fully multi-coated optics for superior light transmission and brightness | 4x 30 model is fully coated | Extra-wide field of view | Large center-focus knob for easy, precise adjustments | 4x 30 model is focus free | Extra-wide pop-up eyecups for long eye relief (compacts) | Non-slip rubber armor (10x 25) absorbs shock while providing a firm grip

Standard View
Xtra-Side® View

10x 25mm 131052

See it wide open and ten-times bigger than life.

Permanently sharp
and clear. Even when
you're not.

Lose your focus and some of
life's finest opportunities can
pass you by.

This hard-earned lesson drove
the creation of our PermaFocus® binocular series.
Simply raise them to your eyes and catch
the action instantly with stunning clarity
— no adjustment necessary. Their unique
focus-free feature keeps them dialed in
for instantaneous viewing at virtually any
distance. They're perfect for fast action
at sporting events, nature observation and
winter days when gloves would hinder the use of
standard-focus binoculars. Precision-crafted, fully coated
optics offer bright, crisp images. Magnify life instantly with
our PermaFocus series.

FEATURES: Fully coated optics for superior
light transmission and brightness | Unique
focus-free feature stays in focus at most
viewing distances | Non-slip rubber armor
absorbs shock while providing a firm grip

The world's best-selling line of binoculars.

The #1 choice for millions of folks.

PowerView.® The powerhouse of the binocular industry, and the most trusted optics in the world for a simple reason – they're the optimum combination of performance and value for any pursuit. Features such as their soft-touch grip pads put them a notch above the rest, and everything looks better through bright, clear fully coated optics. And we purposely crafted these bins with a lightweight, streamlined design so you never have to go without them. The ultimate go-anywhere, do-anything lineup, Powerview features a wide variety of magnifications, styles and sizes to accommodate everything from an extended backcountry hike to a short run to the concert hall.

FEATURES: Fully or multi-coated optics for superior light transmission and brightness | Non-slip rubber armor absorbs shock while providing a firm grip | Contemporary styling

Non-slip rubber armor

NEW 8x 42mm 140842
NEW 10x 42mm 141042

High-magnification, full-size viewing ideal for long-range observation.

8x 32mm 140832

An awesome all-around mid-sized binocular, it's the perfect combination of magnification and carrying convenience.

8-16x 40mm Zoom 1481640

Binoculars of unmatched versatility. Choose 8x for maximum field of view, then zoom all the way to 16x for an ultra-detailed look at your subject.

10x 42mm
141043 (camo)

High-magnification, full-size viewing ideal for long-range observation.

“All-around” means keep a set in your vehicle, day pack, den, desk drawer ...

High-quality, all-around top performers.

There’s a model for every adventure. At prices that don’t make owning one of each out of the question. Our porro-prism Powerview series is a combination of precision optics, durability and versatile styling that will make the most of your time outdoors. One look and it’s clear: you simply can’t do any better for the money.

FEATURES: Multi-coated optics on all full-size models for superior light transmission and brightness | Fully coated optics on all compacts | Non-slip rubber armor absorbs shock while providing a firm grip | Contemporary styling

PowerView® Kit
271650C

Includes the 16x 50mm binocular, tripod adapter and tripod mount.

Insta Focus Pad

7–15x 35mm 137016
7–21x 40mm 132140

Zoom magnification and multi-coated optics make these versatile, bright and clear.

7x 35mm 137307

An ideal, all-purpose, full-sized binocular.

10x 50mm 131056
10x 50mm 131054 (camo)
12x 50mm 131250
16x 50mm 131650
20x 50mm 132050

Popular magnifications, great for examining detail at long range.

8x 25mm 139825
10x 25mm 139025
12x 25mm 139225

Porro-prism compacts with a clear, wide field of view and a variety of magnifications.

7–15x 25mm 139755

Porro-prism compact featuring a 7x to 15x zoom.

Use the extra pack space for trail mix.

10x 25mm
132516

Wide field of view with 10x magnification makes these great long-range compacts.

12x 25mm 131225
12x 25mm 131226 (camo)

High-powered magnification makes these popular pack-along binoculars for viewing wildlife.

8x 21mm
132514

A foldable compact that fits inside a pocket or purse.

10x 32mm 131032
12x 32mm 131232

High-power compacts with extra light-gathering ability.

16x 32mm 131632
16x 32mm 131633 (camo)

Among the most powerful compacts available.

Tripod/Window Mount 784406C

Ultra compact tripod that's easily taken along anywhere and converts to a car window mount. Max height: 8"

Deluxe Bino Harness 19125C

A carry solution of unparalleled comfort and performance. Our new Deluxe Bino Harness keeps the weight off your neck and keeps your optics front and center no matter where the hunt takes you.

Binocular Tripod Adapter 161001CM

Mount any tripod-ready binocular to any standard tripod. Recommended for prolonged observation with any binocular of 10x or more.

Window Mount 784407C

Compact car window mount that's easily taken along anywhere. Tilt and pan handle.

Binocular. A binocular consists of two optical systems that are joined by a hinge and (typically) share a common focusing mechanism. The ability to create an image for both eyes simultaneously provides a realistic perception of depth. Binoculars are available in a great variety of sizes, magnifying powers and features to suit any purpose or preference.

Coated Optics

Lens surface coatings reduce light loss and glare due to reflection for a brighter, higher-contrast image with less eyestrain.

Types of lens coatings

Coated: A single layer on at least one lens surface.

Fully Coated: A single layer on all air-to-glass surfaces.

Multi-Coated: Multiple layers on at least one lens surface.

Fully Multi-Coated: All air-to-glass surfaces feature multiple layers of anti-reflective coating. Fully multi-coated optical systems deliver the brightest, highest-contrast images with the least amount of eyestrain because only a very small percentage of light is lost before it reaches the viewer's eye.

Diopter Adjustment

A fine-focus adjustment ring usually provided around one eyepiece to accommodate for vision differences between the right and left eyes.

ED Prime Glass

ED Prime Extra-Low Dispersion glass delivers amazing color resolution and contrast, and virtually eliminates chromatic aberration and color-fringing to bring out the most distinct details possible in low-light conditions.

Exit Pupil

Refers to the size of the circle of light visible at the eyepiece of a binocular. The larger the exit pupil, the brighter the image. To determine the size, divide the objective lens diameter by the power (an 8x 32 model has an exit pupil of 4mm).

Eye Relief

The distance a binocular can be held away from the eye and still present the full field of view. Extended or long eye relief reduces eyestrain and is ideal for eyeglass wearers.

Field Of View (F.O.V.)

The side-to-side measurement of the circular viewing field or subject area. It is defined by the width in feet or meters of the area visible at 1,000 yards or meters.

A wide-angle binocular features a wide field of view and is better for following action. Generally, the higher the magnification, the narrower the field of view.

Magnification (Power)

Binoculars are often referred to by two numbers separated by an "x". For example: 8x 32. The first number is the power, or magnification, of the binocular. With an 8x 32 binocular, the object being viewed appears to be eight times closer than you would see it with the unaided eye.

Objective Lens

The second number in the formula (8x 32mm) is the diameter of the objective or front lens measured in millimeters. The larger the objective lens, the more light that enters the binocular and the brighter the image.

PC-3® Phase coating

Found on the best roof-prism binoculars, this chemical coating is applied to the prisms to enhance resolution and contrast. Would not provide an advantage on porro-prism models.

Porro-Prism System

In porro-prism binoculars the objective or front lens is offset from the eyepiece. Porro-prism binoculars provide greater depth perception and generally offer a wider field of view.

Roof-Prism System

In roof-prism binoculars the prisms overlap closely, allowing the objective lenses to line up directly with the eyepiece. The result is a slim, streamlined shape in which the lenses and prisms are in a straight line. Roof-prism binoculars are less bulky and more rugged than an equivalent porro model.

Prism Glass

Most optical prisms are made from borosilicate (BK-7) glass or barium crown (BaK-4) glass. BaK-4 is the higher-quality glass, yielding brighter images and high edge-to-edge sharpness.

Rainguard® HD

With Rainguard HD, Bushnell's permanent, patented, hydrophobic and oleophobic lens coating, a foggy view is no longer an issue. This unique coating acts on water drops from rain, snow, sleet and even your own breath, reducing them into much smaller droplets. These tiny drops scatter less light, ensuring a clearer, brighter view.

Resolution

Resolution, or definition, is the ability of a binocular to distinguish fine detail and retain clarity.

Ultra Wide Band Coating

An anti-reflection coating process that is customized for every lens element in the optical path, in order to allow the maximum amount of light from the front glass all the way back to the eyepiece. The result? Optimum brightness and true color across the light spectrum.

Waterproof/Fogproof

Some binoculars are O-ring sealed and nitrogen purged for total waterproof and fogproof protection. These models can withstand complete immersion in water and stay dry inside. The interior optical surfaces won't fog due to rapid temperature change or humidity.

XTR® Technology

As light passes through the many prisms and lenses of a roof-prism binocular, some light is usually lost along the way. Our exclusive new XTR technology – utilizing 60 layers of coatings on each prism – conserves, harnesses and optimizes the available light. XTR delivers an amazing 99.73% light transmission per lens for a combined light transmission of 90%, making the Bushnell Elite® series the brightest binocular in its class.
